**Eastwood City, Quezon City**

July 2024 – Present

- Maintain and enhance company's web CRM using PHP and the Codeigniter framework, implementing new features based on user's requests.

### Baytech BPO Corporation

Web Developer Intern

**Meralco Ave., Pasig City**

January – May 2024

- Maintained and enhanced client web applications using PHP and the Laravel framework, implementing new features based on client requests.
- Acquired foundational knowledge in React.js and Vue.js for frontend development.
- Utilized GitLab for version control.
- Optimized PostgreSQL database management using HeidiSQL for improved data handling.
- Developed and integrated a JSON data retrieval API to fetch data from AWS S3 buckets, enhancing the functionality of the web app's CMS.

## OTHER SKILLS & PROJECTS

- Proficient in web development technologies, including HTML, CSS, JavaScript, and PHP.
- Experience with database management systems, such as MySQL and PostgreSQL.
- Familiar with programming languages such as Python, Java, and C++.
- Proficient knowledge of Microsoft Office Word and PowerPoint.
- Quick learner with a strong aptitude for new technologies and programming languages.
- Ability to analyze and solve complex technical problems.
- Has a good personality with interpersonal skills that can interact effectively with co-workers and clients in a professional manner.

### CAP 401 Capstone Project

Developed a web-based decision support system and programmed an algorithm to assist individuals in making informed decisions about contraceptive use. This platform, implemented using HTML, CSS, Bootstrap, JavaScript, PHP, and MySQL for database storage, integrates the Semaphore API for SMS notifications and the Mapbox API for geolocation services. Guided by the Agile methodology, its iterative development ensured continuous improvement. Accessible at [siguradong-pagaplapano.com](http://siguradong-pagaplapano.com)
